Vocabulary Adjectives

different same strong weak

2 Read the text and find the words. In pairs, discuss what they mean. Check with your teacher.

It's in the genes!

Sophie and Paul are brother and sister. They haven't got the same hair and eye colour. Sophie has brown hair and blue eyes. Paul has blond hair and brown eyes. That's because they've got a different combination of genes from their parents.

We get two genes for our hair colour and two genes for our eye colour. One gene is from our mother and one gene is from our father.

We get different colours from different gene combinations. For example, here, brown eye genes (B) are strong (dominant) and blue eye genes (b) are weak (recessive). People with one B gene and one b gene have got brown eyes because B is strong. People with two b genes have got blue eyes because they are the same type of genes.

3 Read the text again and look at the picture. Write Sophie or Paul next to the right eye colour combination.

Some people in the UK want an unusual pet. This is why they choose exotic animals. Here are three unusual pets that you can have in the UK.

1 Tarantulas

Spiders are scary but some people think tarantulas are pretty. They are quiet animals and they don't need a lot of space or food so they aren't hard work.

2 Pygmy hedgehogs

People like pygmy hedgehogs because they are small and cute. They eat cat food and they eat a lot! They need a lot of space to run and play.

3 Axolotls

They've got a funny name and they look funny, too. They live in the water. They can be brown, black, yellow, white or other colours. And here's an amazing fact: if they lose a part of their body, they can make a new one!
